

System Testing

- [Activating Cards](#)
- [Testing Customer Cards](#)
- [Cable Testing](#)
- [Fail Over Testing](#)

It's essential that every system be tested thoroughly before going live. This will ensure that customers who use LaundryCard will experience it as it was designed. Failure to complete all of the testing procedures will almost guarantee that the customer experience will be less than desired.

Note

The following procedures assume that there is no card deposit amount selected for this system. If there is a card deposit required, the amount that is shown when the card amount is displayed will be less by this deposit amount.
